

1000 wh power station factory in Tajikistan

Overview

Who is supplying HVDC converter stations in Tajikistan & Pakistan?

As part of the CASA-1000 power link Hitachi Energy was 2018 selected as supplier of two high-voltage direct current (HVDC) converter stations in Tajikistan and Pakistan. These converter stations will enable the efficient transmission of renewable hydropower over 800 kilometers from generation sites in Tajikistan to consumption areas in Pakistan.

Does Tajikistan have a power system?

The existing electrical transmission and distribution systems of Tajikistan, designed in the 1970s during the Soviet era, are also being upgraded and expanded, allowing transmission of power from Tajikistan to surrounding countries.

What is Tajikistan's hydropower potential?

Tajikistan's hydropower potential is estimated at 527 billion kWh per year, which exceeds the existing electricity consumption of the countries of Central Asia by 300%. The country's largest project is the Roghun Dam Hydropower Plant project, which when completed is estimated to produce 3600 Megawatts of energy.

How will electricity exports benefit Tajikistan?

Profits from electricity exports will contribute to the financial recovery of the Tajik national power utility company, allowing Tajikistan's electrical utilities to reconstruct existing power infrastructure and attract financing for construction of new generation and transmission infrastructure.
