

# 100w solar panel configuration

## Overview

---

What is a 100 watt solar panel wiring diagram?

The 100 watt solar panel wiring diagram assumes only 1 x 100w panel is being fitted. If you happen to be fitting 2 x 50w panels instead, see our 200 watt solar panel wiring diagram to see how to wire the panels in series. This is a list of every component you need for a 100 watt solar panel set up on your RV or campervan.

How hard is it to set up a 100 watt solar panel?

Setting up a basic 100 watt solar panel setup is not hard. Even if you're a complete beginner to DIY solar, you can easily do it in an afternoon. This step-by-step guide will cover everything you need to know to get your first solar panel system up and running. Here's my extremely detailed video guide of how to set up this basic system.

How much can a 100 watt solar panel power?

How much a 100 watt solar panel can power depends on a number of variables including the time of year, the weather, your location and the type of charge controller you install. But here's an idea of what you might expect to get on an average day of 4 peak hours of sun with an MPPT controller.

Is a 10A controller enough for a 100 watt solar panel?

A 10A controller is adequate for a 100 watt solar panel set up. If you think you may want to scale up your solar capacity in the future, consider buying a higher rated MPPT solar charge controller because it'll be more cost effective in the long term.
