

# 20kW Mobile Energy Storage Container for Bridge Construction in Lomé

## Overview

---

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

How much power does a 20ft container have?

The 20ft container features a 614 kWh 250kW power storage system, which can be built almost anywhere due to the prefabricated design, therefore, much time and money involved in the process will be saved. The control system of voltage and frequency regulation can help meet the emergency demand for power supply.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO<sub>4</sub>) combined with an intelligent 3-level battery management system (BMS);
