

24-hour ups uninterruptible power supply in South Africa

Overview

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) is an electrical device that filters your incoming power and protects your equipment from spikes, dips, surges, high/low voltages and blackouts. Various backup options are available and the period of backup time depends on the client.

How much does a ups cost in South Africa?

An uninterruptible power supply (UPS) protects delicate electronics and appliances during load shedding and reduction in South Africa. UPSs can range widely from R5,000 to R 190,000+, depending on your model, brand, UPS capacity, battery type, features, and warranty.

What is a ups & how does it work?

A UPS is short for uninterruptible power supply; a battery system device automatically switches on to become the power source when it detects an outage or fluctuation in AC power. A UPS can also protect connected devices from damage due to power problems, like voltage dips or surges.

Why does an uninterruptible power supply cost so much?

As an uninterruptible power supply's capacity increases, the cost also increases. Higher capacity models have advanced circuitry and more robust components, contributing to this higher price. The type of battery used in a UPS also comes into play.
