2kw solar off-grid system 5kWh solar container energy storage system

Overview

What is a 3KW off grid Solar System?

A 3kW off grid solar system is cost effective way to get power backups. This solar system comes with solar battery along with other solar components. These solar batteries allow you to store excess solar energy and use it later during an event of blackout. Now say goodbye to frequent power cuts with 3kW off grid solar system.

What is a 5kw off-grid Solar System?

A 5kW off-grid solar system can easily generate 20 units or 20 Kwh of electricity per day, which makes it ideal for locations without access to the power grid. The system consists of highly efficient solar panels, batteries, and an inverter. UTL's 5 kW hybrid solar system combines the functionalities of both on-grid and off-grid systems.

What is a 20kW off-grid Solar System?

A 20kW off-grid solar system includes solar panels, off-grid solar inverter and solar batteries. Since this solar system comes with solar batteries, you can store excess solar energy to be used later on when required. Solar battery will help you to run your connected load very smoothly.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.
