

45 degree lighting solar light

Overview

How to design a solar street light?

1. Solar Street Lighting Demand Design Formula: $P_{LED} = E \times A / (\eta \times U \times K)$
Example: Road width 6m, distance between lights 25m, target illuminance 20 lx → $P_{LED} = 20 \times (6 \times 25) / (0.85 \times 0.5 \times 0.75) = 20 \times 150 / 0.32 \approx 94W$ → Choose a 100W LED module (Luminous flux 15,000 lm) 2. Solar Street Light Photovoltaic System Capacity Calculation Steps: 3.

What are the newest solar lights?

Upgrade your outdoor lighting with our newest 3.0 solar lights - Add life to your yard landscape. Our upgraded brightest solar spot lights feature 45pcs LEDs and support a 120° lighting angle to be adjusted. Unlike other 4-12pcs LED lights on the market, our solar lights are unmatched in brightness and coverage.

How many hours does a solar light last?

Unlike other 4-12pcs LED lights on the market, our solar lights are unmatched in brightness and coverage. Easy create a stunning visual effect in your backyard and enjoy a mesmerizing garden light show every night. 3 Brightness Lighting Modes - Low (14 hours), medium (12 hours), and high (8 hours).

How many light modes are there?

3 Brightness Lighting Modes - Low (14 hours), medium (12 hours), and high (8 hours). You can select the perfect lighting level for your needs. Plus, high-efficiency solar panel and a 2000mAh rechargeable battery supply longer power lighting time.
