50kW Folding Container for Oil Refineries

Overview

What is a floating recovered oil storage tank?

The floating recovered oil storage tank is a towable floating oil/water storage tank with a hull shaped storage pocket. The tank/ barge is manufactured from neoprene coated fabric, which is strong, durable and lightweight. The superstructure is composed of compartments with internal airtight conical bulkheads for increased integrity.

How many m³ crude oil storage tanks are there?

At present, 100,000 m³ crude oil storage tanks are the main container to storage crude oil all over the world. Storage tanks should not be built on the foundation with different hardness, or within the impact range of active geological fault zone.

What is a crude oil storage tank?

A crude oil storage tank is a container for storing crude oil or other petroleum products, usually can be found in refineries, oil fields, oil depots, and other industries. At present, 100,000 m³ crude oil storage tanks are the main container to storage crude oil all over the world.

Are reusable oil storage containers a good idea?

Sealable, reusable oil storage containers are the solution to prevent contamination. They make lubricant storage and handling easy, efficient and clean. Best practice recommendations also include integrating a color-coding system that includes properly labeled containers to prevent misapplication and cross contamination.
