Aarhus substation in Denmark UPS uninterruptible power supply

Overview

Why should you install a UPS system in a substation?

With UPS installations in plants and substations, you can guard against downtime throughout your entire infrastructure. Avoid the irony of a power plant without power with uninterruptible power supplies to ensure the continuity of the utility's supply and minimize disruptions.

What auxiliary equipment does a substation use?

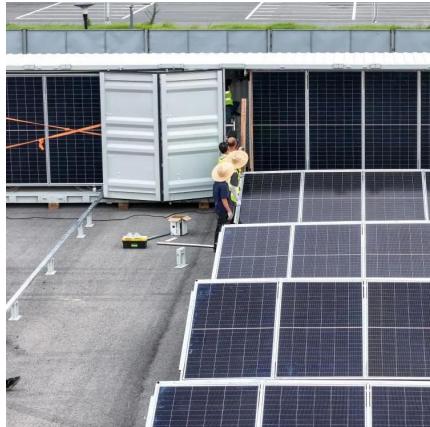

Each substation employs numerous auxiliary equipment including transformers, circuit breakers, switchgear, relays, and SCADA systems performing a range of tasks depending on the locale's specific needs. With UPS installations in plants and substations, you can guard against downtime throughout your entire infrastructure.

Why should you install a power plant ups in an 811 call center?

Power plant UPS keep operations up while a UPS installed in an 811 call center can help keep lines open so utility lines aren't damaged by misinformed digging. Whatever point in your power distribution needs support, Mitsubishi Electric can help.
