Who regulates the power sector in Albania?

The most significant institutions in setting policy and regulation in the power sector in Albania are the Ministry of Infrastructure and Energy (“MIE”) and the Energy Regulatory Authority (“ERE”).

How many solar projects are there in Albania?

So far, the solar auctions have produced two PV projects with a total of 240 MW. Albania reports 7 GW of wind and solar potential and is looking into developing offshore wind in the Adriatic Sea. The availability of renewable energy resources in Albania for some renewable energy technologies is less studied than for others.

How can Albania improve its energy infrastructure?

2. Creation of a smart energy infrastructure: Supporting solar and wind energy source projects to diversify the renewable energy portfolio, harnessing Albania's ample sunlight and wind resources for clean power generation.

Is Albania a good place to invest in renewables?

Opportunities for renewables, and especially for solar and wind energy, are extensive in Albania. According to IRENA's Renewables Readiness Assessment report (2021), the solar radiation is very high throughout most of its territory, with the country enjoying some of Europe's highest number of sunshine hours per year.
