

# **All substations in Greece are equipped with energy storage**

## Overview

---

Does Greece have a battery storage subsidy program?

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in 2023, with the country now turning its focus towards a new 4.7 GW unsubsidized BESS scheme.

Does Greece have a zero-subsidy battery system?

The much-awaited ministerial decree for zero-subsidy standalone battery systems has been published in Greece. So far, Greece has provided support to 900 MW of standalone storage projects under three previous auctions.

Should Greece invest in energy storage facilities?

Currently there is a growing interest for investments in storage facilities in Greece. Licensed projects mostly consist of Li-ion battery energy storage systems (BESS), either stand-alone or integrated in PVs, as well as PHS facilities .

Will res stations be regulated in Greece in 2021?

1 During 2020-2021, Greece has experienced a new explosion of licensing interest for RES stations. The application to the Regulator in mid-2021 exceeded 9000 MW, with most of them having already acquired Electricity Producer Attestation (EPA), far beyond the needs of our national system.
