Overview

Which country has finalised 370-mw solar project in Angola?

Portuguese construction group MCA said it has finalised a 370-MW solar photovoltaic project in Angola with the inauguration of the last plant in a series spanning several provinces in the country. Bailundo solar farm in Huambo province, Angola. Image source: MCA Group (handout).

How much solar energy does Angola have?

SOLAR ENERGY: 100 MW UNTIL 2025 Angola has a high solar resource potential, with an annual average global horizontal radiation between 1.350 and 2.070 kWh/m²/year. Solar energy constitutes the largest and more uniformly distributed renewable resource of the country.

How can solar energy be harnessed in Angola?

The most appropriate technology to harness the solar resource in Angola is the production of electricity through photovoltaic systems. This technology currently presents the fastest ⁹installation time (less than 1 year) and lowest maintenance costs.

Is electricity a viable alternative to diesel in Angola?

Medium and large scale projects in the Eastern System and in isolated systems - without batteries - present in Angola a levelized cost of electricity inferior to \$0,2/kWh, representing therefore an economic alternative to diesel.
