

Anti-solar power system in Barcelona Spain

Overview

Why is Spain not able to rely on solar energy?

But due to oversights or overconfidence, they say Spain has not adapted to its reliance on solar energy. Prices and demand are too low. Its grid and use of battery storage are behind the times. In a country that is a test case for renewables, the solar boom appears to have gone too far, too fast.

Is solar power a good investment in Spain?

Since he took power in 2018, energy developers have built solar parks, proved that power generation had attractive returns and pulled in capital from yield-hungry investors. In 2023 and 2024, Spain added more solar power capacity than any other European country except Germany, whose economy is more than twice its size.

Is Spain's solar energy boom a victim of its own success?

In some ways, Spain's solar energy boom is a victim of its own success. In spring and autumn, the sun is still strong enough to maximise solar output, but mild temperatures mean consumers have no need for things like air conditioning or heating.

How to save energy in Barcelona?

Citizens interested in energy saving have a line of action based on the use of wind and sun as natural resources. Apart from the promotion of solar energy in homes along with the adoption of the solar ordinance 15 years ago, in 2015 measures for using wind power in the context of the "Pla Estratègic de l'energia minieòlica a Barcelona.
