

Arc flash switchgear in China in Melbourne

Overview

What is arc flash protection?

Arc flash protection detects electrical arcs in MV and LV equipment and quickly isolates power to limit arc energy and minimize risks.

What arc flash mitigation solutions are available?

Improve safety with our extensive portfolio of arc flash mitigation solutions including arc quenching and arc-resistant switchgear, Power Xpert XGIS switchgear, Power Xpert Dashboard, Power Defense molded case circuit breaker, Insulgard, arc flash relays and more.

Is your switchboard causing arc flash?

But your switchboard's design might be quietly increasing your risk—even before anyone opens a panel or flips a breaker. Arc flash energy depends on available fault current, clearing time, and working distance—but all of those are directly influenced by how your switchboard is built.

Can switchboard design reduce arc flash risk?

Yes. Lowering incident energy through faster breakers or improved layouts can reduce the required arc-rated PPE level for tasks. Switchboard design isn't just about distribution—it's about protection. Every layout decision, from breaker selection to busbar spacing, shapes your arc flash risk profile.
