

Are there any power station generators in Belgrade

Overview

Will Serbia build a coal-fired power plant?

On June 30, 2011, Serbia's state-run power utility Elektroprivreda Srbije (EPS) and Italy's Edison signed a preliminary deal to jointly develop two coal-fired generating units in Serbia generating a combined 750 megawatts. Edison pledged to build the units.

What is Nikola Tesla power plant complex?

Nikola Tesla Power Plant complex comprises the Nikola Tesla A station and Nikola Tesla B power station. The plant was commissioned between 1970 to 1985. By far the largest coal plant in Serbia, the complex provides approximately 47 percent of the total capacity of the electric power system of Serbia.

How much electricity does Tesla B produce?

TPP Nikola Tesla B was first synchronised on March 11, 1983. Its chimney is 280 metres tall. It appears that the capacity of the units has been increased later on as EPS now reports that the two blocks have capacity of 650MW each and total of 1300 MW. In 2022, Plant A produced 7,824 GWh of electricity and Plant B produced 6,584 GWh.

Are there any power station generators in Belgrade
