# Are there red solar panels

## Overview

---

Which solar panels match red-tiled roofs?

Austrian solar manufacturer Sonnenkraft has debuted its new “Terracotta” solar panel that matches red-tiled roofs and is historic-building compliant.

What color is a red photovoltaic?

The red photovoltaic from the Italian FuturaSun: the Silk® Nova Red. The color given to the panel, a module of 370 Wp composed of 108 half cells, is in this case the glass. FuturaSun has perfected a coating technology that offers a new aesthetic to the photovoltaic integrated with buildings.

Are red and brick photovoltaic panels a trend?

In recent years, however, color options based on a precise market strategy have increased. In particular, red and brick color photovoltaic panels have become a true trend that can increase the acceptance of solar technology in the built environment, thanks also to the ability to meet building codes.

Are terracotta solar panels a good option for red tiled roofs?

“The terracotta module is also the perfect solution for design-savvy customers with red tiled roofs and contributes to local added value.” The 400W double-glass solar panels have red frames, and have general building approval from the German Institute for Building Technology (DIBt).

## Are there red solar panels
