

Australian manufacturer of 10kW photovoltaic container

Overview

Are 10kW solar systems a good investment in Australia?

10kW solar systems are a great investment for Australian homes with high levels of electricity consumption or businesses with relatively small electricity needs. This article takes a look at 10kW solar system pricing, energy production and returns in Australia. How many panels & how much roof space for a 10kW solar system?

.

What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?

.

What is a 10kW Solar System?

10kW solar systems are on the large side for residential installations (where 5kW to 6.6kW is much more common). So as mentioned above, 10kW systems tend to be most appropriate for homes or businesses with significant amounts of daytime electricity consumption above 40kWh per day.

How much does a solar system cost in Australia?

Solar Choice publishes a monthly Solar PV Price Index that tracks average pricing trends in every capital city in Australia. According to Solar Choice's own data, the average 10kW solar system price in Australia as of July 2025 is about \$0.91 per watt – or about \$9,130 after the federal STC rebate is deducted.
