

BESS lithium iron phosphate solar container battery

Overview

What is China's new lithium iron phosphate battery energy storage?

China's Gotion High Tech has unveiled the latest generation of its lithium iron phosphate utility-scale battery energy storage products and mega-capacity cells, reflecting the industry trend towards packing more energy into the standard 20-foot container.

What is a lithium phosphate battery system?

The system is built with long-life cycle lithium iron phosphate batteries, known for their high safety and durability, making it a reliable choice for renewable energy generation, voltage frequency regulation, and energy storage in industrial parks or commercial buildings.

What is a Bess 20 ft solar system?

The 20' systems are designed and shipped with the batteries pre installed utilizing UN 3536 shipping standards which can dramatically lower installation costs. Each BESS container is rated at 1000kW AC inverter allowing for easy AC coupling of your renewable energy project (690V).

What is a Bess container?

Each BESS container is rated at 1000kW AC inverter allowing for easy AC coupling of your renewable energy project (690V). Utilizing string architecture topology vs traditional centralized PCS design, the MEG 1600 allows for better system availability and lower maintenance downtimes.
