

Base station communication connector

Overview

What is a communication base station?

Communication base station setups will usually include a wide array of different technologies, including power supplies, data servers, head end, radio repeaters, and communication systems that allow for high-speed continuous information flow. It can also be used as part of a leaky feeder system in the communication network.

How do I connect a base station?

Base Station Connection and Routing — Fully insert the Power Cable and Interface (I/F) Cable connectors into their respective ports in the underside of the Base Sta-tion. Then connect to an AC Adapter, and plug the AC power cord into the (wall) outlet. Figure 5. Connecting the Base Station.

What is an optical connector for a base station?

JAE has been developing optical connectors for base stations since 2000 (Figure 4). Originally, we developed a “relay connector” that connects the base station enclosure panel and wires to the optical transceiver on the board, using optical fibers.
