

# Battery Cabinet Safety System

## Overview

---

What are the safety storage cabinets for lithium-ion batteries?

Safety storage cabinets for passive or active storage of lithium-ion batteries according to EN 14470-1 and EN 1363-1 with a fire resistance of 90 minutes (type 90) — fire protection from the outside-in and from the inside-out.

How do I choose a battery storage cabinet?

No matter what safety level you choose, all cabinets offer these key safety features: If you only wish to store batteries in the cabinet, choose the STORE version. If you intend to charge (active storage) batteries directly in the cabinet, then choose the CHARGE version.

Are batteryguard battery safes fire-resistant?

Every Batteryguard battery safe is built with a fire-resistant construction at its core, ensuring compliance with the strictest safety requirements and standards. A battery fire can devastate your business. With a Batteryguard battery cabinet, you charge and store your batteries with complete peace of mind.

Why do you need a batteryguard Battery Cabinet?

A battery fire can devastate your business. With a Batteryguard battery cabinet, you charge and store your batteries with complete peace of mind. You protect your staff, prevent damage, and meet the requirements of your insurer. And in some countries, you may even benefit from financial incentives or grants.
