

# Battery cabinet current setting

## Overview

---

How do I connect a battery cabinet to a power system?

Procedure 1. Furnished with the battery cabinet are battery disconnect circuit breaker alarm lead assemblies. Refer to the power system installation manual to use these alarm leads to connect the battery cabinet battery disconnect circuit breaker alarm into the power system alarm circuits.

Where do I install a line-up and match Battery Cabinet?

Line-up-and-match battery cabinets are installed adjacent to the UPS. The recommended installation location is on the right side of the UPS cabinet. See Figure 2 and Figure 3 for line-up-and-match configuration views. Contains two or three battery strings to be used with the 93E 30 kVA UPS.

How to protect a lithium battery energy storage cabinet?

At the same time, setting the charging and discharging parameters, configuring the safety and protection settings, and protecting the lithium battery energy storage cabinet from potential dangers such as overcurrent, overvoltage, and overtemperature are necessary.

How many battery cabinets can be connected together?

The battery cabinet is designed to be daisy-chained together with additional battery cabinets. There is no limit to the number of battery cabinets that can be connected together. However, a maximum system current of 30 A should be maintained regardless of the number of interconnected battery cabinets. Procedure NOTE! Refer to Figure 7
