

Belize installs solar power generation and energy storage

Overview

Does Belize use solar power?

Belize uses solar power on a smaller scale, with the Government having installed solar micro-grids and solar-powered streetlights in rural communities not yet connected to the national grid. The Government of Belize, along with Belize Electricity Limited (BEL), intends to launch a pilot project introducing electric vehicles.

Will the government of Belize invest in solar energy?

The Government of Belize intends to encourage investment in utility solar-energy facilities. However, it has not yet publicly announced a request for proposals. On a smaller scale, the Government of Belize has installed solar micro-grids and solar-powered streetlights in rural communities not yet connected to the national grid.

How will Bel's integrated battery system work?

The integrated battery system will help stabilise fluctuations inherent in solar photovoltaic generation, ensuring a steadier power supply. In his remarks, BEL's Chairman E. Andrew Marshalleck said, "Today's signing marks the furthest we've come in realizing our ambitions to harness the power of the sun."
