## Overview

---

What is a 5MWh energy storage system containerized?

The 5MWh energy storage system containerized is a intelligent monitoring and high protection level, and is suitable for a variety of complex scenarios to meet the energy storage needs of the industrial and commercial sectors, the electric power grid, and renewable energy. The 5MWh energy storage system container consists of 12 energy storage units.

How many energy storage units are in a 5MWh energy storage system?

The 5MWh energy storage system container consists of 12 energy storage units. A single energy storage unit is made up of 1 lithium battery cluster. Due to their high capacity and small size, 3.2V/314Ah lithium batteries make excellent energy storage containers and designs. Each battery cluster is comprised of 4 battery boxes and 1 high-voltage box.

What is Mercury Max 5MWh liquid cooled container?

Mercury MAX 5MWh liquid-cooled container adopts the 1P104S large PACK solution, which increases the energy density by about 20%, effectively optimizing the production process and saving costs; the compact design and reasonable matching of the power of the hydrothermal system can further improve the energy density of the energy storage system.

What is the difference between Zenergy energy storage container and 5MWh?

Zenergy energy storage container is equipped with self-produced 314Ah batteries, and the 5MWh energy storage container is equipped with self-produced 314Ah batteries. Through modular design, it can be flexibly arranged and expanded, and the system is more standardized.
