

Bosnia and Herzegovina Energy Storage and Power Generation Company

Overview

Is Bosnia and Herzegovina a net exporter of electricity?

Bosnia and Herzegovina (BiH), a country of around 3.5 million people, is currently a net exporter of electricity - the only one in the Western Balkans. More than half of its electricity generation capacity is made up of hydropower, while the remainder is made up of five lignite power plants.

How is energy used in Bosnia and Herzegovina?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Does Bosnia and Herzegovina need a hydropower plant?

Hydropower has historically been the dominant renewable energy source in Bosnia and Herzegovina, and several hydropower plants are in operation. The country has been exploring opportunities to expand its hydropower capacity, but such projects can face environmental and social challenges.

What if Bosnia & Herzegovina used its technical potential?

As we can see, if Bosnia and Herzegovina would use its entire technical potential, it would increase the generating power by 390%, and would become one of the key net exporters of the WB6. Greenhouse gas emissions in Bosnia and Herzegovina are (for 2018) around 27,44 million tons of CO₂ equivalent.
