

Brasilia PV module prices

Overview

Are solar modules coming to Brazil?

However, some of these PV modules have not yet arrived in Brazil, which will be reflected in the import data for the first quarter of 2024. In 2023, the price of solar modules in Brazil fell by an average of 40%, mainly due to the expansion of the Brazilian solar industry.

How much does PV cost in Brazil?

In Brazil's regulated electricity market, the price of PV has fallen from more than US\$100 per MWh in 2013 to US\$32 in 2022, and even just over US\$20 at its lowest point in 2019. Photovoltaic power and wind power are one of the lowest-cost power generation technologies available.

Why are Brazil's PV module imports so high in 2023?

According to a report by Greener, a Brazilian PV consultancy, Brazil's PV module imports reached 17.5GW in 2023, slightly lower than the 17.8GW in 2022, but up 70% from 10.4GW in 2021 and still maintaining a record high. The continued downward trend in PV module prices has driven the acceleration of Brazil's PV imports.

Why are solar panels so expensive in Brazil?

Despite global overcapacity, several factors may contribute to a slight increase in solar panel prices in Brazil, with shipping costs and quotas for fiscal exemptions on imported PV modules playing a key role. From pv magazine Brazil imported around 10.1 GW of PV modules between January and May, according to PV InfoLink.
