

British energy storage container production line

Overview

How big is battery energy storage in the UK?

The UK had a total of 4.4GW of battery energy storage system (BESS) capacity as of June 2024. And the sector is braced for further significant growth, with the total capacity of projects in the pipeline rising from 50.3GW to 95.6GW between 2023 and 2024.

Is Coalburn a good investment in UK energy storage?

The 500MW/1,000MWh Coalburn project in Scotland, UK, currently under construction. Image: CIP. Despite a 12% year-on-year fall in the capacity of newly submitted planning applications in 2024, there is still a strong interest in the UK energy storage market as a whole.

What is the next generation of E-Stor battery energy storage?

The company says the next generation of its E-STOR battery energy storage range will include systems from 10MW up to more than 100MW. Latest developments: In September 2023, Volvo Energy signed a 'letter of intent' with Connected Energy with a view to jointly developing a battery energy storage system.

How many battery storage projects are there?

The pipeline of battery storage projects has continued to grow steadily again, from 84.4GW in December 2023 to 95.5GW in May 2024. This edition of the EnergyPulse report on Energy Storage shows there is 8.7GW of batteries in operation and under construction and more than 30GW projects have now been consented.
