# Budapest inverter energy storage power supply outdoor

## Overview

---

Will Hungary's new battery energy storage system help Green the grid?

The new facility supports a growing push to green Hungary's power grid. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

Is Hungary stocking up on battery backup?

Hungary isn't alone in stocking up on battery backup as it charts its green energy path. In neighbouring Bulgaria, a massive 124 MW/496 MWh battery energy storage system went live in Lovech earlier this year.

How much solar power does Hungary have?

State secretary for energy transition of the Energy Ministry Viktor Horvath noted that Hungary had built more than 8,000MW of solar capacity in the past 5-6 years and one-quarter of the electricity generated in the country came from renewable sources last year.

How will a new solar power plant help Hungary's power grid?

The new facility supports a growing push to green Hungary's power grid, especially as solar capacity surges. With no moving parts and a rapid response time, batteries like this are designed to stabilize the grid by storing excess solar power and releasing it when demand peaks.
