

# **Can solar glass still generate electricity if it is damaged**

## Overview

---

What happens if a solar panel is broken?

A solar panel can still provide some power even if it is broken. A solar panel with a broken or missing glass cover can still be used because the electricity-producing cells inside the panel are not damaged. As mentioned before, it won't be as efficient as a solar panel in good working order, you will lose efficiency.

What happens if a solar panel breaks glass?

If your solar panel has broken glass, two things can happen: Water or condensation can seep between the glass and the backing film. Water would disrupt the operation of the solar panel, and water is a bridge for electricity.

Can glass be repaired in solar panels?

There are examples of using poly film and polyurethane to repair the glass. These two examples do seal the unit so that water cannot get inside the panel and prevent shards of glass from dislodging. However, they do not repair the glass. Underneath the glass remains cracked. Is there glass in solar panels?

Yes.
