

Cape Town 5G solar container communication station flow battery project

Overview

Are large energy storage projects coming to South Africa?

It's great to see more large energy storage projects coming online in South Africa. Just 2 months ago, Eskom unveiled another large battery storage project. Eskom's Hex site is specifically designed to store 100MWh of energy, enough to power a town such as Mossel Bay or Howick for about five hours.

How many MW will South Africa's solar power plant deliver?

With an installed solar capacity of 540 MW of PV, and a battery storage capacity of 225MW/1,140MWh, the plant is designed to deliver 150 MW of dispatchable power from 5 am to 9.30 pm year-round to the national grid under a 20-year power purchase agreement with South Africa's national power utility company, Eskom.

What is the battery energy storage system (BESS) project?

"The battery energy storage system (BESS) project aims to serve as a pilot project to eventually incorporate energy storage within the city's network," explains CoCT Energy MMC Xanthea Limberg. "By co-locating the battery system at the Atlantis PV plant, it allows the solar PV and BESS to operate in synergy as a hybrid plant.

How far is Eskom's energy storage project from Norway to South Africa?

The extensive project involves more than 9,000 kilometers of cabling, equivalent to the distance from Norway to South Africa. It's great to see more large energy storage projects coming online in South Africa. Just 2 months ago, Eskom unveiled another large battery storage project.
