

China solar powered generator in South-Africa

Overview

Will powerchina build a 342 MW solar project in South Africa?

PowerChina has signed an EPC contract with SolarAfrica Energy, a Pretoria-based PV developer, to build a 342 MW solar project in South Africa. PowerChina said that the project in De Aar, Northern Cape, will be South Africa's largest single-unit solar power plant by total installed capacity.

What is the largest solar power plant in South Africa?

Located in the town of De Aar in South Africa's Northern Cape Province, the project will have a total installed capacity of 342 megawatts, making it the largest single-unit solar power plant in South Africa. It will supply clean energy to large data centers and other commercial and industrial users across the country.

How many homes will a solar power plant generate in South Africa?

Once fully operational, the solar plant will generate enough power for 80,000 South African homes. Since 85% of South Africa's electricity currently comes from coal, this project aligns with the country's Just Energy Transition Partnership, which aims to reduce coal reliance and phase out seven coal-fired power stations by 2032.

Where is a 100 MW solar power project in South Africa?

A 100MW solar power project is under development in South Africa's Limpopo Province, spearheaded by CGN Africa Energy, the China-Africa Development Fund, and Samancor Chrome, one of the region's largest minerals-processing companies.
