What is automatic transfer switching equipment (ATSE)?

A specialized component in advanced Automatic Transfer Switching Equipment (ATSE) systems. It provides enhanced flexibility, safety, and operational efficiency by combining the functionality of a standard bypass switching with the ability to physically withdraw or isolate the ATS from the power circuit for maintenance or replacement.

Who is ABB (Thailand)?

We are appointed by ABB (Thailand) Co., Ltd. to become an official dealer, along with many world leading brands. For 40 years, we have formed solid background in electrical and automatic control area, gained trust for our ability to achieve goal from many manufacturers and customers.

What is a closed-transition transfer switch?

Closed-transition transfer switches provide a “make-before-break” switching action and utilize a momentary paralleling of both sources (<100ms) during the transfer period, when both sources are available. Both sources must be synchronized (phase, voltage, and frequency) before momentary paralleling them.
