

Columbia PV Pump Control Inverter

Overview

What voltage is a solar pump inverter?

The DC voltage range of the solar pump inverter is (120V, 480V) and the recommended MPPT range is (250V, 400V). IP20 protection, solar inverter humidity <95% RH, storage temperature (-20°C, 60°C). MPPT control technology allows the solar pump inverter to detect the power of the solar panels.

Which solar water pump inverter is available online?

The 5.5kW three-phase AC 220V solar pump inverter is now available online. This solar pumping inverter integrates advanced MPPT tracking for precise voltage detection and optimal performance. The solar water pumping system supports AC and DC input, with a DC voltage range of 300V~380V and a power factor >0.99.

What is Solartech PB series solar pumping inverter?

Solartech PB Series Solar Pumping Inverter controls and regulates the operation of solar pumping system. It drives the pump by converting DC power produced by solar array into AC power and adjusts the output frequency according to solar radiation in real time to implement maximum power point tracking (MPPT).

What is int gd100-pv solar pump inverter?

INVT GD100-PV solar pump inverter is specially designed for photovoltaic (PV) water pump systems. It is suitable for agricultural irrigation, water supply in mountainous areas, desert control, and other scenarios, making it an ideal solution for green energy applications. 1. Advanced MPPT algorithm
