

# **Communication green base station in Cape Verde**

## Overview

---

What is the Cape Verde electricity project?

The project consists in the design and construction of a set of inter-related electricity generation, network and storage components during the 2023-2029 period under Cape Verde's National Electricity Masterplan (2018-2040).

Can Cape Verde be a model for digital and energy transition?

The main objective is to make Cape Verde a model for digital and energy transition. By strengthening local technological capabilities, this initiative will stimulate economic growth and boost the country's international competitiveness.

Why is Cape Verde a Strategic Technology Center in West Africa?

Thanks to these advances, Cape Verde is positioning itself as a strategic technology center in West Africa. Local start-ups and SMEs are benefiting from innovative services, enabling the emergence of solutions in key sectors such as healthcare, agriculture and education.

Why is Cape Verde investing in digital technology?

In the digital sector, the investment includes the installation of a state-of-the-art submarine cable network. This technology strengthens connectivity between the various islands of Cape Verde and improves international links, notably with Europe and other African regions.
