## Overview

---

What type of battery is used for solar energy storage?

Other battery and inverter comparison charts: DC-coupled batteries are the most common type of battery used for home solar energy storage and must be connected with a compatible grid-connected hybrid inverter to create a solar energy storage system with backup power.

Are all solar batteries the same?

There's a solar battery out there to suit everyone's needs and not all are built the same. Here are the main ones: Lithium-Ion Batteries: Consider these the top-dogs of home solar storage. Efficient, lasting, and light, you may know popular ones like Tesla Powerwall or LG Home 8.

Which solar batteries work best?

AC-coupled batteries like Tesla Powerwall and Enphase IQ Battery integrate with existing solar systems, while DC-coupled options work best with new installations. Energy Independence - A solar battery lets you store excess energy and use it when needed, reducing reliance on the grid.

What types of batteries are available?

The tables include the most popular high-voltage and low-voltage (48V) DC-coupled batteries of the managed variety, plus self-managed lithium batteries for hybrid energy storage or stand-alone (off-grid) power systems. See our comprehensive home solar battery review for more details about lithium battery types and costs.
