What are electric double layer capacitors?

Electric double layer capacitors represent a hybrid solution between fast-acting capacitors and energy-dense batteries. By leveraging physical ion storage and the large surface area of activated carbon, they enable rapid charge/discharge, long cycle life, and wide application in modern electronics and energy systems.

What are electric double-layer capacitors (EDLCs)?

Electric double-layer capacitors (EDLCs) are devices based on Carbon/Carbon-based electrodes and have the characteristics of being charged and discharged very fast (within seconds) and can therefore be used where high power is required. Despite the high-power capability, these devices have limitations in energy density.

What are TDK supercapacitors?

TDK's large-capacity, thin supercapacitors expand the possibilities of application development.
