

Customized solar panel greenhouse manufacturer in New York USA

Overview

What is a greenhouse?

A growing environment designed specifically for you. A greenhouse is an aluminum-framed structure, glazed with glass or polycarbonate, that is used to propagate and/or grow plants. Solar Innovations® designs and manufactures custom greenhouses to each customer's exacting specifications, no matter the size or purpose.

Where can LUMO solar panels be used?

Since the LUMO greenhouse integrated solar panels have been installed in commercial greenhouse production across the US and Canada. Explore our agrivoltaic solutions for enhanced crop yields, electricity production and greater sustainability. Transforming greenhouses with integrated solar technology.

Can solar panels transform greenhouses?

Transforming greenhouses with integrated solar technology. Soliculture Lumo offers integrated solar panels that enhance crop yields while providing renewable energy. Our luminescent solar collectors are designed for greenhouses, promoting sustainable farming practices and improving efficiency in agricultural production.

How much does it cost to design a custom solar panel?

There are no design fees to create a prototype of your custom solar panel. Some, but not most, designs may require a fee to prepare the machinery to create your specific panel at volume. Our MOQ is 500 - 2,000 units depending on the size of the panel.
