

Cyprus solar Glass Project

Overview

Will Cyprus become a hub for solar energy innovation?

Georghiou predicts the initiative, coupled with Cypriot industry collaboration, will lead to a substantially higher solar energy deployment in Cyprus over the coming years, reduce environmental degradation and make the country a hub for solar innovation, technology transfer, industry start-ups and job creation.

How can Cyprus become more energy self-sufficient?

In an attempt to make Cyprus more energy self-sufficient, the EU-funded TwinPV initiative focuses on bolstering the country's technological know-how through the sharing of expertise on the entire solar energy cycle – from cells and modules to storage and smart electricity grids.

What is happening with Cypriot industrial partners?

Additional workshops with Cypriot industrial partners are strengthening collaboration between industry and the academic world to develop innovative solutions and products for the Cypriot solar sector – and Europe as a whole. European Commission news headlines on the broader subject of research and scientific activities.

Can Denmark be a hub for solar innovation?

Renewable energy experts from Austria and Denmark are joining local engineers, researchers and PhD students to address technical challenges, catalyse innovation and design strategies to put the country on track to generating a large percentage of its electricity demands domestically while creating jobs and making it a hub for solar innovation.
