What is AC/DC distribution box?

The AC distribution unit is used to provide the AC converted by the inverter for the grid connection interface. GEESYS DBW1.5~20K AC/DC Distribution Box is mainly used in small and medium PV systems and it may provide a complete PV system solution for the customers together with our small and medium power inverters. Power: 750KVA Phase: THREE.

What is geesys PV AC/DC distribution box?

GEESYS PV AC/DC distribution box consists of DC distribution unit and AC distribution unit. The DC distribution unit is mainly used to collect the DC from the PV panels and supply it to the inverter. The AC distribution unit is used to provide the AC converted by the inverter for the grid connection interface.

What is the difference between solar DCDB box and solar ACDB box?

Solar DCDB box distributes the DC solar power to the solar inverter. Solar ACDB box distributes the AC power converted from solar power inverter to the grid or utility. We can use Fuse, mcb and spd as the main components for extra protection. They save the inverter and the solar power system from the external surges from the Grid or natural spikes.

What is a DC combiner box?

GEESYS offers DC Combiner Boxes that provide interconnection between the input leads from the solar PV modules, and the output lead to the re-combiner box or inverter. The combiner box is customized for different configurations, based on the number of strings of solar PV modules used in the PV layout.
