

Earth leakage breaker factory in Estonia

Overview

What are the different types of earth leakage circuit breakers?

There are two types of earth leakage circuit breakers—a voltage ELCB and a current ELCB. The working principle of a voltage ELCB is straightforward. One terminal of the relay coil connects to the equipment's metal body, while the other terminal connects directly to the earth.

What is an earth leakage circuit breaker (ELCB)?

The earth leakage circuit breaker (ELCB) is used to protect persons against electric shock hazards and to prevent a fire. This also have the same function as MCCB. This type of breaker is ELCB rated 225 Amp or less, and is available to protect a motor and the associated wiring or conductors.

What are earth leakage protection devices?

Earth leakage protection devices are crucial for electrical safety, preventing electric shocks and fires caused by faulty wiring or insulation failures. Three common devices used for this purpose are Earth Leakage Circuit Breakers (ELCBs), Residual Current Devices (RCDs), and Residual Current Circuit Breakers with Overcurrent Protection (RCBOs).
