

Eastern European Solar Containerized Fixed-Type Cooperation

Overview

Is Eastern Europe a promising market for solar energy deployment?

Eastern Europe indeed represents a promising market with untapped potential in solar energy deployment, given its early-stage market development. Solar energy, being highly competitive and increasingly cost-effective, is expected to play a key role in the region's energy future.

What is the large scale solar Central Eastern Europe Summit?

The Large Scale Solar Central Eastern Europe Summit provides a vital platform for fostering critical collaborations between the leading developers, IPPs, utilities, investors, and technology providers driving solar and storage deployment and innovation across the entire region. If playback doesn't begin shortly, try restarting your device.

What is the European solar PV industry alliance (ESIA)?

The European Solar PV Industry Alliance (ESIA), launched in December 2022 to reinforce the cooperation within industry, set itself the target of 30 GW of production capacity along the value chain, an objective considered achievable by 2030. The ESIA pipeline includes more than 20 projects, including several at multi-GW scale.

Which European countries have the most solar energy?

The age of solar energy is dawning in Eastern Europe: According to the European industry association SolarPower Europe, Poland has been one of the top ten leading countries in Europe in terms of PV deployment since 2016. Hungary has joined the list after adding 1.6 gigawatts (GW) of PV capacity in 2023, a 45 percent increase over the previous year.
