## Overview

---

What is an emergency lighting backup inverter?

An emergency lighting backup inverter is a device that converts DC battery power to standard AC voltages to provide backup for various lighting systems, including fluorescent and LED lights, in an emergency.

What is an emergency lighting inverter?

Emergency lighting inverters are an excellent choice for use with multiple fixtures and in cases where emergency LED drivers cannot be used, such as with integral-base lamps. Major benefit of emergency inverters is that they offer the advantage of long-distance remote installation. Here's how an emergency lighting inverter typically works:.
