

# **Energy-saving outdoor solar lights**

## Overview

---

What are some home uses for outdoor solar lighting?

Popular home uses for outdoor solar lighting include pathway light sets, wall-mounted lamps, freestanding lamp posts, and security lights. Outdoor solar lighting systems use solar cells, which convert sunlight into electricity. The electricity is stored in batteries for use at night.

Do outdoor solar lights increase your electric bill?

Outdoor solar lights are easy to install and virtually maintenance free. Best of all, using them won't increase your electric bill. Popular home uses for outdoor solar lighting include pathway light sets, wall-mounted lamps, freestanding lamp posts, and security lights.

Are solar lights good for outdoor use?

Solar lights are overwhelmingly powered by LEDs because they consume significantly less energy than traditional incandescent or fluorescent bulbs, allowing for smaller batteries and longer operational times. Because they are designed for outdoor use, most solar-powered outdoor lights offer decent water and weather resistance.

Are solar-powered outdoor lights LED?

Almost all solar-powered outdoor lights are LEDs, with either integrated or replaceable bulbs. Solar lights are overwhelmingly powered by LEDs because they consume significantly less energy than traditional incandescent or fluorescent bulbs, allowing for smaller batteries and longer operational times.
