

# Energychain Energy Storage Project

## Overview

---

When will a 500mw/1000mwh shared energy storage project start?

On April 29, 2025, the first phase of the 500MW/1000MWh shared energy storage project in Luliang County, Qujing City was successfully grid-connected and operational.

How is energy stored in China?

In eastern Chinese city of Changzhou, air compressed to over 120 atmospheres in salt caverns 1,000 meters underground is used for energy storage. The heat generated is transferred to thermal oil, and then the electricity is regenerated on command.

What are the four types of energy storage technologies?

This marks the first domestic shared storage demonstration project to integrate four types of new energy storage technologies—lithium iron phosphate, sodium-ion, vanadium flow, and flywheel storage—signaling a transformative step toward high-quality construction and efficient utilization of storage systems.

Which energy storage station project was successfully connected to the grid?

Source: ASIACHEM WeChat, 1 April 2025 The 101MW/205MWh energy storage station project constructed by CHN Energy I&C for the Guoneng Penglai Power Generation Co., Ltd. was successfully connected to the grid on 29 March.
