

# **Ethiopia grid-connected solar panel manufacturers**

## Overview

---

Who owns the Ethiopian power grid?

EEP owns and operates the Ethiopian national power grid with all high voltage power transmission lines above 66 kV including all attached electrical substations and almost all power plants within the national power grid.

What are the benefits of solar power in Ethiopia?

Ethiopia, blessed with abundant renewable energy sources, can harness the power of the sun through solar power. By doing so, communities can break free from traditional energy constraints, reducing reliance on non-renewable sources and lowering long-term energy costs.

How many solar-powered mini-grids are there in Ethiopia?

Five solar-powered mini-grids help Ethiopians benefit from clean, reliable electricity. Nearly 4,000 households are now connected to these mini-grids.

Will Ethiopia become the first utility-scale solar PV plant connected to the National Grid?

The project will become the first utility-scale solar PV plant in Ethiopia connected to the national grid. This ESIA study has been prepared in compliance with the Environmental Impact Assessment Proclamation 299/2002 and the applicable international safeguard policies, in particular the IFC Performance Standards.
