

# **Fast charging of folding containers used in East Asian aquaculture industry**

## Overview

---

The Chinese government has made tremendous efforts to promote the advancement of the aquaculture industry through the technical resources of its extension system. However, research on the Chi.

What is China's aquaculture extension system?

China's aquaculture extension system has supported numerous industry achievements during the last 40 years. The three main areas of accomplishments are production capacity, extension programming, and access to information and training. 4.1. Production capacity improvements.

Who is the largest aquaculture company in Asia?

CP Foods is one of the largest aquaculture companies in Asia, with extensive operations in Thailand and other countries. It is a major player in shrimp farming and aquafeed production. 2. Marine Harvest (Mowi ASA) Mowi ASA is a global leader in salmon farming, with operations in several Asian countries, including China and Vietnam. 3.

Are aquaculture extension funds adequate in China?

However, the world's average agricultural extension investment accounted for 0.96% of gross value of agriculture output in 1980 (Gao, 2001). It is obvious that aquaculture extension funds in China are insufficient when compared to the world average. Funds for extension activities are extremely limited.

Can Singapore become a hub for tropical marine aquaculture technology?

Through innovation, R&D, and a close partnership among government, academia and industry, Singapore has the potential to become a hub for tropical marine aquaculture technology. This will translate to greater food security for Singapore and more business opportunities for the aquaculture industry in the long term.
