

Financing BESS Solar PV Panels

Overview

How do you finance a solar & Bess Solar System?

When it comes to adopting solar + BESS, there are generally three financing approaches: Outright Ownership - The buyer pays the full upfront cost, takes advantage of incentives, and owns 100% of the energy system. Leasing - A third-party owns the system, and the customer pays a fixed monthly lease fee to use it.

How does a solar + Bess lease work?

Under a solar + BESS leasing arrangement, the developer or provider owns the system and installs it on the customer's property. The customer then pays a fixed monthly fee (lease payment) for the right to use the electricity generated and stored by the system. There are generally two types of leases: Customer does not own the asset.

Why should we invest in solar PV & Bess?

This investment, supported by two decades of forward-thinking and sustained industrial policy, has driven manufacturing economies of scale, rapid technology advancements, speed of deployment and relentless cost deflation in both solar PV and BESS.

How are Bess projects financed?

Today, we are seeing non-recourse project finance for 600+ MW portfolios, mezzanine debt entering the capital stack, and public banks co-financing with private lenders. For developers, asset managers, and financiers alike, this is a call to sophisticate how BESS projects are packaged and financed.
