# Find energy storage projects

## Overview

---

How many energy storage projects are there in the world?

It has 9.4GW of energy storage to its name with more than 225 energy storage projects scattered across the globe, operating in 47 markets. It also operates 24.1GW of AI-optimised renewables and storage, applied in some of the most demanding industrial applications.

What is energy storage technology?

Energy storage technology allows for a flexible grid with enhanced reliability and power quality. Due to the rising demand for energy storage, propelled further by the need for renewable energy supply at peak times, energy storage facilities and producers have grown tremendously in recent years.

What is a battery energy storage system (BESS) project?

A Battery Energy Storage System (BESS) project is an energy storage technology that uses rechargeable batteries to store electrical energy from various sources and release it when needed, functioning like a large-scale rechargeable battery that stabilizes the grid and enables renewable energy integration. Which is the largest BESS project in India?

What is Europe's largest battery storage project?

It was billed as Europe's largest battery storage project when it became operational at the end of 2014 and was revolutionary thanks to its technology providing a range of benefits to the wider electricity system, including absorbing energy then releasing it to meet demand. 6. Fluence Advancion Energy Storage Systems
