

Generator container installation

Overview

This article will provide a detailed introduction to the installation points of containerized diesel generator sets, covering the entire process from site preparation to final commissioning, ensuring that you can complete the installation smoothly and allow the generator set to operate safely and efficiently. What is a containerized generator set?

() On a regular basis, containerized generator sets (CGS) are placed onboard ships to provide replacement power in case of damage to one of the ship's generator sets, or additional power, e.g. to provide power to extra deck equipment or reefer containers.

How to install a generator set?

For lifting the set to install it, the lift points provided on the base frame shall be used. The generator set base frame is specially designed for ease of moving the set. Points of attachment shall be checked for cracked welds or loose nuts and bolts before lifting. A spreader bar is required to prevent damaging the set.

Can you put a generator in a container?

Generators can be put into containers. There are a number of benefits to doing this including: Easier transportation and installation making them ideal for temporary or remote applications. They are more secure as typically they are lockable which prevents unauthorised access. Do I need to service my power system?

Put simply, yes.

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.
