

Georgia solar Panel Equipment Manufacturer

Overview

What is GA Solar?

GA Solar is a group comprised of leading experts in solar manufacturing and installation, academia, finance, and the law. They are leading the effort in Georgia to promote the economic and environmental benefits of solar energy through education, advocacy, and industry support. Join their campaign to urge the Public Service Commission to Scrap the Solar Cap!.

What are the largest solar installations in Georgia?

One of the largest solar installations in Georgia is Butler Solar Project 103. As the average cost of solar drops and more large solar projects come online, more and more Georgia residents will be able to use clean, renewable energy in their homes, even without installing rooftop solar. The passage does not provide a complete list, but mentions one notable installation.

What's going on with Georgia's solar industry?

Politics envelops the solar industry. Vice President Kamala Harris visited the plant earlier this year. At the state level, Republican Gov. Brian Kemp has wrestled with Democratic U.S. Sen. Jon Ossoff over political credit for electric vehicle and renewable energy investments flowing to Georgia.

Where are solar panels made?

A solar panel, or module, is assembled from solar cells most commonly made from wafers cut from ingots of polysilicon. Today, the company's solar cells are imported from Asia.
