

Germany s new solar panels selling price

Overview

How much does solar energy cost in Germany?

While people who harness wind power are given lower per kilo watt hour price, people who use solar energy are offered a higher price which encourages people to install solar panel systems on their roofs. According to Dr. Matthias Lang (2015), the average installation cost of PV in Germany has fallen to €1 to €2 per watt from €5.

Why are solar panels so expensive in Germany?

While Germany aims to be the top in the world in terms of solar energy production, the prices of solar panels have remained high due to its limited domestic supply unlike in Japan and the United States. This indicates that as long as Germany is able to double its production of solar panels, it will be able to improve its price even more.

Can Germany double its production of solar panels?

This indicates that as long as Germany is able to double its production of solar panels, it will be able to improve its price even more. Germany is one of the leading countries in the world to implement solar power energy in its establishments.
