

# Greece outdoor power bms development

## Overview

---

Is Greece a potential energy hub for the Balkans?

Power produced by renewables and hydroelectric plants accounted for 57% of Greece's energy mix, an 8.5% rise from 2022 according to the country's Independent Power Transmission Operator IPTO. The Greek government is positioning Greece as an eventual energy hub for the Balkan region and Europe.

Is Greece a potential energy hub?

The Greek government is positioning Greece as an eventual energy hub for the Balkan region and Europe. Greece will submit an updated energy and climate plan to the EU in June 2024 which will reflect its continued commitment to increasing RES production.

How much will Greece invest in offshore wind parks?

The Greek government anticipates that over 7 billion euro will be invested in the development of offshore wind parks to achieve the goal of Greece's Energy Plan (ESEK) of 1.9GW.

Why does Greece have a high wind and solar potential?

Due to its geographical position and shape, Greece has a verified high wind and solar potential (especially at the eastern part of the country), and the western part has a significant hydro potential (mainly at the west) that is already being exploited.
